Carpool Lane Usage

Carpool Lane Popularity Lags, Despite Rise in Congestion in 2004

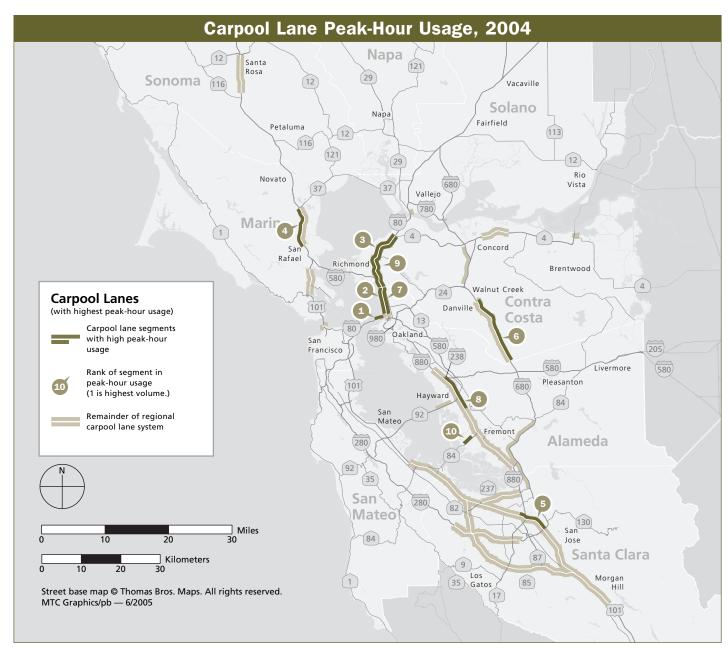

- Carpool lanes on Interstate 80 in Alameda and Contra
 Costa counties are the region's most heavily used segments. Westbound carpool lanes occupy three of the top
 10 slots not surprising given that the westbound
 morning commute from State Route 4 to the Bay Bridge
 has consistently ranked as the region's most congested
 commute. Two eastbound Interstate 80 carpool lane segments are also among the most heavily used, occupying
 the number seven and number nine slots.
- In seven of the 10 most heavily used carpool lane segments in 2004, peak-hour vehicle counts were down from the year-earlier period. The explanation for this decrease in carpool lane popularity is not clear, since congestion increased on many freeways in 2004, relative to 2003 levels.
- Over the five-year period from 2000 to 2004, the number of peak-hour, carpool-lane vehicles declined in six of the 10 segments listed. This is consistent with the overall

Bay Area Carpool Lanes With Highest Peak-Hour Usage, 2000-2004

	Peak-Hour Carpool Vehicles ¹					Percent Change	
Carpool Lane	2000	2001	2002	2003	2004	2003-2004	2000-2004

¹Includes buses, vanpools and motorcycles

downward trend in congestion during this period. The carpool lanes that stand out as exceptions are on Interstate 80 between Powell Street and the Contra Costa County line. Here, westbound morning carpool volumes increased by 33 percent and eastbound evening carpool volumes increased by 9 percent. Again, this may reflect the unique levels of congestion in the I-80 corridor.
